## Summary

Software Engineer with three years of commercial Ruby on Rails experience, focused on PostgreSQL-backed product features, REST APIs, integrations, and reliable delivery. Comfortable turning requirements into tickets and working software, collaborating with clients and investigating distributed workflows through logs and tests. TypeScript/React, AWS, authentication, and responsible AI-assisted development are supporting strengths.

## Core technologies

- **Primary:** Ruby on Rails · PostgreSQL · REST APIs · Git
- **Secondary:** TypeScript · React · Docker · AWS S3 / Secrets Manager / SES · Stripe · Auth0 · Devise · MQTT
- **Additional:** Airtable · Mailgun · Heroku · geofencing · AI-assisted development

## Professional Experience

*Shelfio - Software Engineer / Aug 2025 - Feb 2026*

- Worked on a Dockerized access product connecting Rails/API software with physical hardware, including MQTT message flows and location-based access.
- Collaborated on system improvements involving authentication, containerized environments, and hardware-connected workflows.
- Investigated integration issues across Rails services, MQTT communication, and hardware-connected workflows through log analysis, tests, and repeatable reproduction on developer devices; verified fixes in a testing facility.

*Lunar Logic - Software Engineer / Feb 2022 - Aug 2024*

- Worked directly with clients to gather requirements, break work into tickets, implement Rails features, test changes, and release to the client's production system.

- Built Rails CRUD workflows, REST APIs, PostgreSQL data models, and integrations with AWS services, Stripe, SportsData.io, and Mailgun.
- Implemented authentication and authorization using Devise and Auth0, including access policies and user-whitelisting flows.

## Selected projects

- **End-to-end client website delivery - local service business.** Worked directly with a client to take a website from an early idea to a live, mobile-friendly delivery, handling feedback rounds, hosting, domain, email, and SEO. Built with TypeScript and React. Public site: <https://sensoskoczki.pl/>
- **Briefly** - a Ruby on Rails workspace that turns public YouTube videos into source faithful briefs using Gemini. Implemented asynchronous processing with Solid Queue and retryable failures. Reviewing and refactoring the AI-assisted code.

## Additional contributions

- **Mentoring and onboarding:** acted as a coding buddy for junior developers, explaining workflows and pairing on issues.
- **Technical interviewing:** participated in candidate interviews using live tasks and technical questions.
- **Responsible AI communication:** created and delivered an internal talk about responsible use of LLMs for developers.

## Additional Training

- **Using AI in Business Development** - Google Umiejętności Jutra: AI, partner SGH, 2026. Completed a five-week program and passed the final assessment.

## Education and languages

- **Postgraduate Studies, Web Application Programming** - AGH University of Science and Technology, Kraków (2020 - 2021).
- **Bachelor's Degree, Computer Science (Software Engineering)** - University of Economics in Kraków (2016 - 2020).
- **Polish** (native) · **English** (B2).
